PROJECTS

Freelancing Website

- Technologies implemented in Back End- Java, Servlet, JSP, MySql.
- Technologies implemented in Front End- HTML, CSS, JavaScript, Bootstrap.
- API integrated- Twilio(for mobile verification), Dropzone(for uploading files), reCAPTCHA.
- Freelancing is a type of self-employment.
- Developed a platforms that allow you to post your work easily, and clients can contact you directly.
- This website contains two modules one for client and another for freelancer
- Freelancer can:-
 - create and share the projects.
 - Freelancers can simply sell skills and services online, and responsible for all the fees associated with that project.
- Client can:-
 - create posts to hire a freelancer with minimum bid.
 - purchase or modify projects uploaded by the freelancer

Portfolio Website

- A portfolio website will help you showcase your work and skills, projects, and information about you to your clients or customers.
- having a portfolio website you will gain more exposure and create more opportunities for yourself in the future
- Technologies used- Html, CSS, JavaScript & Bootstrap.
